Spinal Cord Injury Program

Healing Hands Make the Difference

The effects of a spinal cord injury can be devastating and far-reaching for most individuals. Valir Rehabilitation Hospital understands what it takes to give these individuals independence and offers a comprehensive program to assist in reaching their goals.

Your knowledgeable team of professionals with you, the patient at the center consist of: Physical medicine and rehabilitation physicians, physical, occupational, speech, recreational, and respiratory therapists, rehabilitation nurses, case management, dietitians, and pharmacy services.

The healing hands offered by a dedicated and experienced staff make the difference in the level of independence a patient and patient's family can achieve

Spinal Cord Injury Program Components

- Home and work evaluations conducted by licensed therapists with appropriate and valuable recommendations
- Wheelchair seating and positioning expertise
- Instruction on all equipment needs
- Electrical Stimulation and other modalities for muscular return and strengthening
- Community resources for the patient and family to manage the diagnosis and its effects
- Caregiver education to assist the family with their role in the patient's recovery stage

Putting you on the road to independence is our goal.. at Valir Rehabilitation Hospital,

“it's not how you get here... it's how you leave.”
